As a leader in business education for more than 50 years, the Rensselaer Lally School of Management graduate programs develop savvy business leaders who drive innovation for commercial success in the rapidly changing global marketplace. We invite you to pursue a Lally MBA, M.S., or Ph.D. degree program to strengthen and advance your academic or professional career.

**Master of Business Administration**

**MBA—Full-time, one year**

Lally’s MBA program focuses on the strategic management of technology, and on creating value through innovation and entrepreneurship. The MBA curriculum prepares business leaders with the skills and integration across traditional business functions that are essential for meeting real-world challenges within the dynamic global economy. Through interactive, hands-on instruction, students acquire an overall understanding of the sources of value creation. The Lally MBA also gives students critical expertise in launching, running, and growing a successful business. This cross-disciplinary program uses an experiential approach to help students develop strategies for solving complex business problems. MBA students can specialize in one of six concentrations:

- Business Analytics
- Finance
- Management Information Systems
- Marketing—New Product Development
- Supply Chain Management
- Technological Entrepreneurship

**Master of Science Degrees**

**M.S. Business Analytics**

The M.S. in Business Analytics prepares students with the skills to understand, analyze, and integrate data in business functions with special emphasis on “Big Data.” The program offers foundational business concepts with skills in analytical and statistical modeling and data management. The curriculum includes a business core, an analytics core that includes both modeling and data management, and a domain-focused application core that includes project-based courses. Students use software platforms and real-world data sets in their courses to gain practical experience.

M.S. Supply Chain Management
The M.S. in Supply Chain Management prepares students to design and manage supply chains in manufacturing and service industries. In this program, students understand the perspectives and skills to design supply chains, develop strategies to optimize supply chain operations, identify opportunities to leverage information technology, and create effective demand fulfillment capabilities in firms. This program includes concepts from industrial marketing, operations management, and information systems. The curriculum includes a business core, a supply chain core, and specialized electives that include real-world project-based courses that allow students to develop expertise in specific areas of supply chain management.

Doctor of Philosophy
Ph.D. Management
The Doctor of Philosophy program in management trains students to become scholars who are highly skilled in conducting research and teaching, and for careers where high levels of research skills and analytical capabilities are required. This is delivered through formal courses, seminars, independent studies, examinations, written papers, workshops, presentations, and the dissertation. The program usually requires a minimum of four years to complete. It provides a Ph.D. in the following areas:

- Finance
- Accounting
- Information Systems
- Marketing
- Operations Management
- Organization Behavior
- Strategic Management
